

**Alaska State Chamber of Commerce  
2008 Position**

**Privatization of State Government Functions**

The Alaska State Chamber of Commerce believes that efficiency, both in terms of cost and timing, be achieved through encouraging maximum privatization of State of Alaska functions. The State Chamber urges the Legislature and the Administration to reduce state government forays into the private sector. The State Chamber strongly recommends the State get out of the construction business (electrical, drilling, guardrail, paving and others).
