

Alaska State Chamber of Commerce 2010 Priority

Limit Growth of Government to FY 2010 Budget Level

The Alaska State Chamber of Commerce will work with the Administration and the Alaska State Legislature to pass legislation that maintains state spending at Fiscal Year (FY) 2010 levels.

In the event that spending increases are approved by the Alaska State Legislature and the Governor of Alaska, we urge the passage of legislation that requires that any increases in state spending beyond FY 2010 levels, must be offset by corresponding budget cuts, or changes to the Permanent Fund, or the establishment of a statewide income, or statewide sales tax to raise sufficient revenue to pay for any growth of government beyond FY 2010 levels.
