

Statement from the Alaska Support Industry Alliance, Alaska Chamber of Commerce, the Alaska Oil and Gas Association and the Resource Development Council for Alaska, Inc. in response to the Conference Committee's version of the gasoline bill:

The conference committee bill misses the mark. Rather than focusing on advancing the Alaska LNG Project, it injects targeted industry and income taxes that threaten the very companies producing energy for Alaska's homes and businesses. The Alaska Oil and Gas Association, Alaska Support Industry Alliance, Alaska Chamber of Commerce, and Resource Development Council urge the Legislature to reject these counterproductive provisions and pass a clean bill focused on getting the gasoline built and delivering lower energy costs for Alaskans.
